

## **CO<sub>2</sub> INTOXICATION DANGER**

**Substantial leaks from CO<sub>2</sub> incubator supply lines could cause CO<sub>2</sub> concentrations to rise to a level where there is risk of intoxication and, ultimately, death.**

**In the event of a suspected CO<sub>2</sub> leak:**

- 1. Clear the affected area immediately and cordon it off with warning signs and tape.**
- 2. Report the leak to your Lab Manager immediately.**
- 3. Do not re-enter the affected area until the all clear has been given by your Lab Manager or CLS Health & Safety.**
