Dear Ms Grayson

GENETICALLY MODIFIED ORGANISMS (CONTAINED USE) REGULATIONS 2014

NOTIFICATION OF CLASS 2 CONTAINED USE

Thank you for your notification of the intention to undertake class 2 activities involving genetically modified micro-organisms (GMMs).

The Competent Authority has no objection to your performing the notified activity, GM6/17.1 entitled "Use of genetic tools to study the basic biology/biochemistry of the *Cryptosporidium parvum* parasite, and to identify and validate potential drug candidates for cryptosporidiosis".

This letter does not imply endorsement by the Competent Authority of any physical containment and associated safety precautions at your centre, or that the measures you have taken are sufficient to comply with the Regulations and other relevant legislation. HSE inspectors may have additional observations and requirements when conducting site inspections under the Health & Safety at Work etc. Act 1974.

Regulations 14 and 15 require that the Competent Authority be kept informed of any changes to the notified details.

Yours sincerely

pp Dr Maria Taraktsoglou, Health & Safety Executive
On behalf of the Competent Authority

Scottish Government
